

QUALITY POLICY

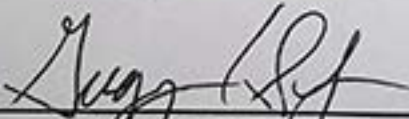

The top management of InterMotive, Inc. is committed to a quality policy leading to the satisfaction of all interested parties and to continual improvement of performance. The organization will focus on customer needs to ensure products and services satisfy customer expectations by offering a broad range of components, enabling users to achieve and maintain the quality, product reliability and performance that their own quality policies dictate. We are striving to be always ahead of competition in all respects using marked feedback and benchmarking results through structured and intensive continual improvement processes.

The achievement and consolidation of our objectives will be pursued through careful management of resources, training, monitoring, measurement and optimization of all processes, information and training of personnel at all levels.

The achievement of these objectives will be the discriminating strength of InterMotive, Inc. in a highly competitive market.

All personnel must observe and adhere to the quality policy.
