

# AutoSense™

## Automatic Vehicle Security

### Overview

- AutoSense™ technology is a product feature that automatically locks vehicle doors or locks the transmission in Park, depending on application
- Eliminates the need for manual locking, leaving hands free and vehicle secured
- Perfect for delivery vehicles, law enforcement and other applications that require frequent exiting from the vehicle

### Features

- Door-locking feature automatically locks vehicle doors, auxiliary doors and cabinets based on the proximity of a fob to the module
- Shift-locking feature automatically locks the transmission in Park based on the proximity of a fob to the module
- Activated using either an OEM or InterMotive supplied fob, depending on application
- AutoSense is available on:
  - **IdleGuard™**: Auto-enables Secure Park on the Dodge Charger Pursuit and Protected Idle™ on the Chevy Tahoe PPV
  - **EcoStar™ III**: Key in/out idle reduction system auto-locks doors
  - **IdleLock™**: Key out secured idling system auto-locks transmission in Park
- AutoSense technology will be added to more products coming soon

*Product features may vary by make, model or year. See instructions for complete details.*
