

# Camera Controller Module

## Expanded View Safety System

### Overview

- Activates up to three cameras by providing three outputs to trigger system (left and right turn, and Reverse)
- Increases the driver's range of vision while the vehicle is in motion
- Reduces labor and warranty costs

### Features

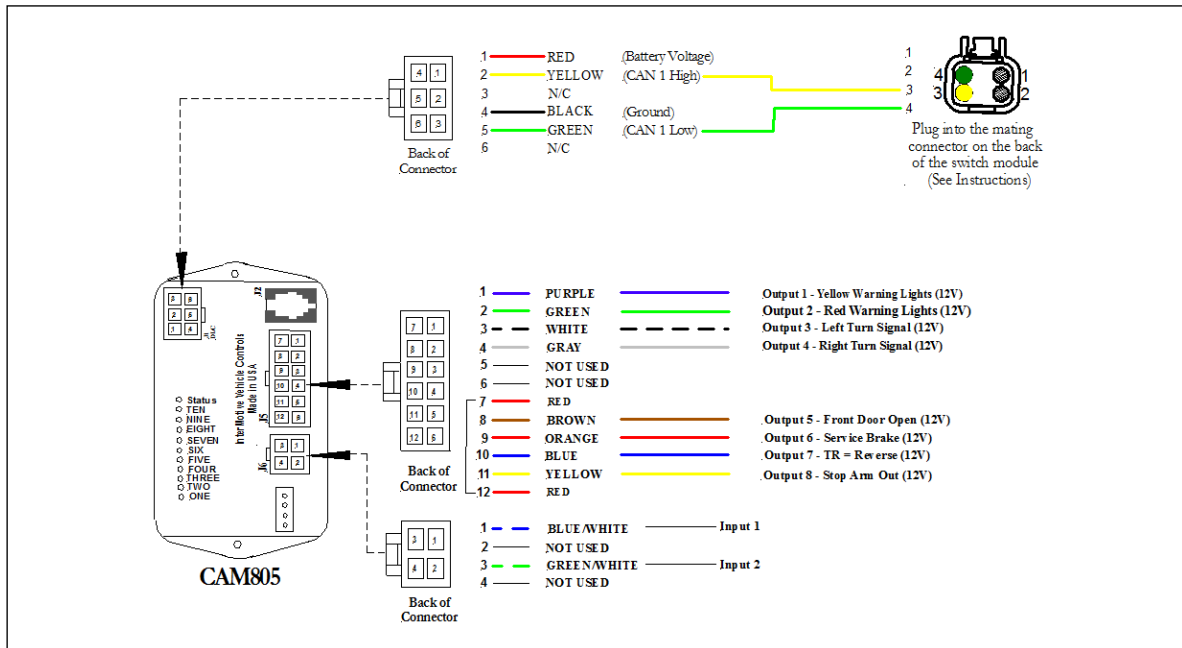

- Cameras are continuously enabled when the turn signals are activated or when the transmission is in Reverse
- Provides additional safety interlock output that can be used for slide out or other vehicle function
- Built-in self diagnostics
- Perfect for vehicles with limited lines of sight including buses, work trucks and RVs
- Simple plug and play connections; no cutting of factory wires
- Includes Intermittent Fault Filter™ (IFF) technology to eliminate false readings
