

CAT burglars beware with InterMotive's new anti-theft alarm

AUBURN, CALIFORNIA – November 14, 2022

InterMotive Vehicle Controls, a leading manufacturer of electronic control systems, has developed CATAlert™, an alarm designed to combat rampant catalytic converter theft.

CATAlert works on any commercial vehicle chassis and will sound the horn if any attempt is made to remove the catalytic converter or disable CATAlert.

The most unique feature is the ability to report real-time tampering or theft using telematic devices, so fleet customers can instantly detect which vehicle is being assaulted and stop thieves from potentially wiping out an entire yard of vehicles.

The alarm consists of an in-cabin module and sensors attached to up to two catalytic converters on the vehicle. The output signal can activate interior lights or signal a telematic device.

For more details, contact InterMotive's master distributor, LGS Group, at 775-831-2002.

###

InterMotive Vehicle Controls provides commercial safety and performance optimization products. Our plug and play electronic control systems leverage a vehicle's own data networks to enhance its functions in new ways. We specialize in custom solutions for the work truck, law enforcement, ambulance, fire truck, transit and paratransit, school bus, RV and personal-use mobility industries.
