

Two InterMotive products now available for RAM chassis

AUBURN, CALIFORNIA – May 9, 2023

InterMotive Vehicle Controls, a leading manufacturer of electronic control systems, has added RAM to its list of available chassis for the EcoStar III™ idle mitigation product and the Engine Monitoring & Shutdown system.

EcoStar III™ is an enhanced automatic engine stop/start system designed to reduce idling and optimize fuel economy. Users can custom program settings, track real-time data and more through the mobile app. The system also includes anti-theft features such as key-out mode, shift lock and automatic door lock.

The Engine Monitoring & Shutdown system (EMS) helps prevent damage to the engine and transmission due to overheating. EMS monitors specific powertrain conditions and initiates a warning and shutdown sequence if an issue is detected.

For more details, contact InterMotive's master distributor, LGS Group, at 775-831-2002.

###

InterMotive Vehicle Controls provides commercial safety and performance optimization products. Our plug and play electronic control systems leverage a vehicle's own data networks to enhance its functions in new ways. We specialize in custom solutions for the work truck, law enforcement, ambulance, fire truck, transit and paratransit, school bus, RV and personal-use mobility industries. To learn more, call 800-969-6080 or visit www.intermotive.net.
