EcoStar™ III Enhanced

Auto-Secured Idle Mitigation System

Overview

- Automatically turns the engine off and on based on customizable conditions including low battery voltage, temperature, inputs or mobile app settings
- Theft prevention features include automatic locking for doors, transmission and ignition key; perfect for delivery vehicles
- Optimizes fuel economy, reduces engine wear and helps save money; may cut idle time by as much as 50 percent
- Does not alter OEM powertrain calibrations
- Includes Intermittent Fault Filter™ (IFF) technology to eliminate false readings

Features

- Uses Bluetooth and a mobile app to custom program module settings, enable manual remote stop/start and track fuel savings data
- No need to turn off the engine or lock doors; functions are automatically controlled when the user leaves the vehicle with an InterMotive fob (using AutoSense™ technology)
- The shifter and ignition key are automatically locked in place when the fob is not detected (transmission must be in Park)
- Doors unlock and functions are immediately restored when the user returns to the vehicle with the fob
- Thermostat regulation option available to keep interior temperature comfortable for personnel or temperature-sensitive equipment
