

eVolution

Intelligent Engine Stop/Start System

Overview

- Automatically stops/starts the engine based on customizable conditions to charge the OEM and auxiliary batteries
- Applications include Class A, B and C RVs, ambulances, law enforcement vehicles and work trucks
- Pre-conditions and internal safeguards ensure safe operation of the system
- Simple plug and play connections to the OEM chassis

Features

- Key-out mode provides vehicle security by allowing the key to be removed from the ignition
- Includes a configurable fuel level monitor to prevent restart on low fuel
- Over rev output prevents overcharging the battery
- Monitor mode activates with audio and visual indicators
- Automatically shuts down the engine if an over-heat condition is detected while idling in Park

Product features may vary by make, model or year. See instructions for complete details.
