

eVolution+™

Enhanced Engine Stop/Start System

Overview

- Automatically stops/starts the engine based on customizable conditions to charge the OEM and auxiliary batteries
- Allows full use of a vehicle's equipment without concerns about draining the battery
- Optimizes fuel economy and helps prevent engine wear from prolonged idling
- Available for GM Tahoe/Suburban, Ford PIU and E-Series chassis
- Simple plug and play connections
- Pre-conditions and internal safeguards ensure safe operation of the system

Features

- Operates with the key in or out of the ignition
- High idle function minimizes charging time for batteries, with multiple configurable triggers
- HVAC control function keeps your vehicle comfortable while the system is engaged
- Configurable outputs available including equipment enable, alarm and more
- Anti-theft features include key-out mode with the shifter locked in Park and automatic door lock/unlock control (in development) using AutoSense™ technology
- Includes a mobile app for programming custom settings, real-time data and fuel savings
- Hood switch option available

Product features may vary by make, model or year. See instructions for complete details.
