

# IdleLock™ (for J1939/Type C Bus)

## Secured Idling with Key Removed

### Overview

- Theft prevention system allows the vehicle to idle with the key removed from the ignition with the parking brake applied
- System is activated with an enable button and removal of the key within 3 seconds
- Simple plug and play connections
- Available for International chassis (e.g., Type C school buses); other J1939 applications coming soon

### Features

- **SECURE:** Walk away from your idling vehicle with confidence that everything is safely locked
- **FULL FUNCTIONALITY:** All lights, equipment and HVAC are still fully functional while engaged
- **SAFE FROM THEFT:** Automatically shuts off the engine if the parking brake is released without the key in the ignition
- Includes Intermittent Fault Filter™ (IFF) technology to eliminate false readings

*Product features may vary by make, model or year. See instructions for complete details.*
