

PTO Pro

Park Brake switch automation

**Designed for
PTO durability.**

Overview

- Reduces Park Brake actuator wear and minimizes vehicle downtime caused by excessive use
- Improves route efficiency by helping drivers save time at each stop
- Streamlines PTO activation and smooths operation for rear loader refuse trucks
- Automatically applies the Park Brake when the vehicle is stopped on a slant for enhanced safety

Operation

- Automates the Park Brake switch during PTO operation, enabling quicker task completion
- Notifies drivers when the Park Brake is not set and the module is active by flashing the dashboard Brake light
- Automatically releases the Park Brake when the transmission is shifted out of Park, ensuring seamless transitions
- Specifically designed for Ford F-series chassis

*Product features may vary
by make, model or year.
