

EcoStar™/EcoStar™ III now part of Quebec's green technology incentives for work trucks

In Canada, the Quebec government has recently approved and added InterMotive's EcoStar™ and EcoStar™ III idle reduction systems to its "Green Technologies" list.

Buyers are entitled to a 30% subsidy (maximum \$1,000 CAD per vehicle) on all parts and labor when an EcoStar™ or EcoStar™ III system is installed on work trucks weighing less than 10,000 lbs.
