

# School Bus Flasher

## Lights and Arms Controller

### Overview

- Passenger safety system that warns other drivers when the bus is approaching a stop
- Controls flashing function of amber warning lights and red stop lights
- Controls the operation of the stop arm and crossing arm
- Integrates with the InterMotive FlexTech™ programmable electrical system

### Additional Features

- Functions as a stand-alone system or integrated with the InterMotive FlexTech™ system:
  - Integration provides additional capability of inputs/triggers for extra functions
  - Reduces the need for wiring, creating a more efficient system
- Simple plug and play connections
- Includes Intermittent Fault Filter™ (IFF) technology to eliminate false readings

*Product features may vary by make, model or year. See instructions for complete details.*
