UIM & PIM Combo (for 2025 RAM 1500)

Officer Protection with Custom CAN Utilization

InterMotive
VEHICLE CONTROLS
An ISO 9001:2015 Registered Company

Upfitter Interface Module® Features

- Provides access to CAN vehicle data to activate and control equipment

- Acquires CAN data passively to eliminate unnecessary network communication

- Easily programmable using our Graphical User Interface with AND/OR logic

- Eleven digital outputs can be programmed as desired:

  - Momentary (e.g., air horn siren)
  - Latching (e.g., emergency light)
  - Time-hold (e.g., weapons lock)
  - Time-delay (e.g., delayed siren)
  - Flashing (e.g., lights on when door opens)

- Multiple inputs can control a single output

- Includes **IdleLock™ with AutoSense™**:

  - Theft prevention system for idling vehicles
  - Automatically locks the shifter in Park when the officer exits with a fob
  - All lights, equipment and HVAC are still fully functional while system is engaged
  - Disables auxiliary equipment/weapons or provides lock delay function via an output

Police Interface Module Features

- Allows for multiple InterMotive features to be utilized on one module including:

Officer Protection Package

  - Increases an officer's situational awareness by detecting movement behind the vehicle
  - Provides warnings cues, locks doors, rolls up windows, flashes lights and more

Blackout Mode

  - Perfect for covert operations, this system deactivates exterior and interior lights and chimes, and mutes the horn

- Custom reprogramming of steering wheel auxiliary buttons

- Wig-wag lights function for front high beams and rear stop/turn lamps
