

# Upfitter Interface Module® UIM16R

## Programmable Relay Power Center

### Overview

- Passive CAN data acquisition
- Configurable inputs and outputs, which can be programmed as momentary, latching, time-hold, time-delay or flashing
- Outputs are controlled based on the module's configuration created using the InterMotive PRPC Download manager program (GUI)
- Simple plug and play connections for CAN data
- Combine with switch backer and/or expansion boards to increase system capabilities

### Features

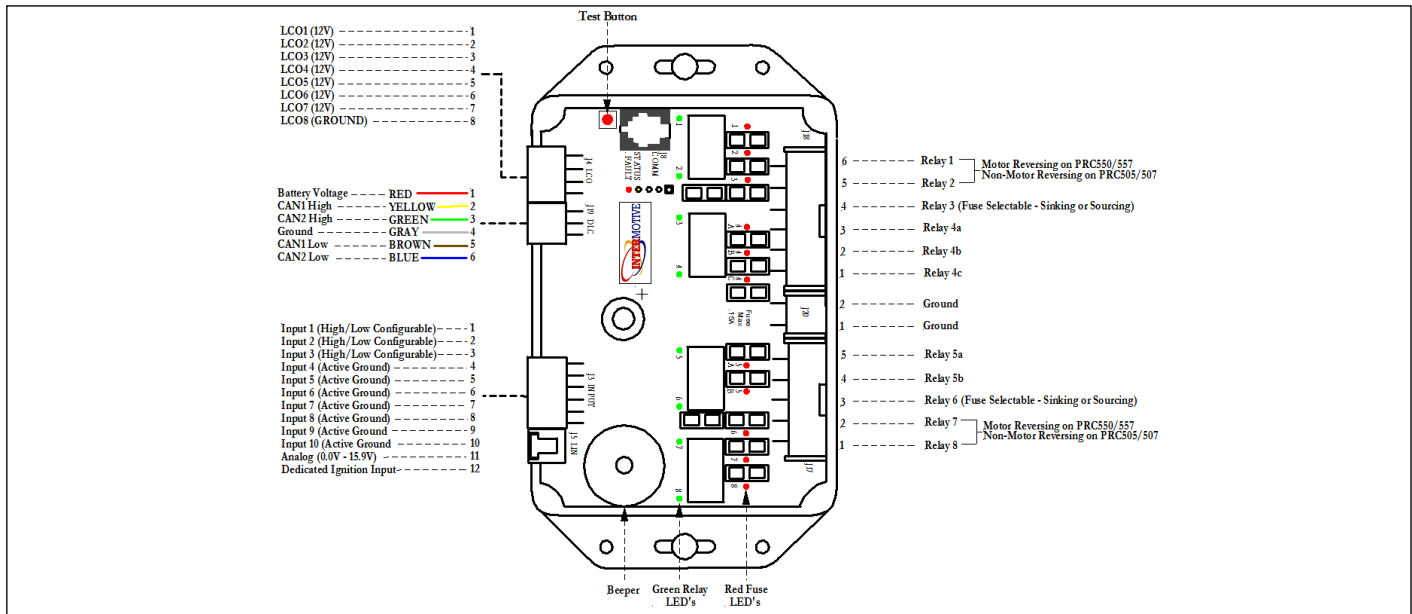

- FLEXIBLE DESIGN: Saves time, cost and additional components; graphical user interface (GUI) makes programming output functions as easy as clicking a button
- CONTROL: Multiple inputs can control a single output
- CONVENIENCE: Works with select Ford, GM, Stellantis and Medium Duty chassis to provide real-time CAN data
- Warning LEDs offer easy troubleshooting

## Specifications

## EXAMPLE SCHEMATIC

### SPECIFICATIONS

**Number of Inputs** 3 active high/low GUI-configurable inputs, 7 active low inputs and 1 analog input

**Number of Outputs** 7 active high output, 1 active low output & 8 relays

**Current Draw** 150 mA

**Quiescent Draw** < 2 mA (sleep current)

**Temperature Range** -40°C to 80°C

**Dimensions** 4" L x 2" W x 1" H

### AVAILABLE DATA INCLUDES: (partial list)

- **Transmission:** Range | Fluid Temperature
- **Lights:** External Lights\* | High and Low Beams | Turn Signals
- **Doors:** Lock | Unlock | Door Ajar
- **Brakes:** ABS Event | Park Brake | Service Brakes
- **Other:** Vehicle Speed | Seatbelt
- **Engine/Fuel:** Clean Tach Output | Check Engine Light (MIL)\*\* | Coolant and Oil Temp.† | RPM | Engine Running | Ignition Switch Status | Fuel Level | Intake Air Temp. | Throttle Position | Vbat | VSS (2.2 Hz/mph)

\*Daytime running lights only work with Ford vehicles

\*\* Check Engine Light Output does not work with RAM vehicles

† Oil Temperature only works with Ford vehicles
