

UIM+ & PIM Combo (for 2025 RAM 1500)

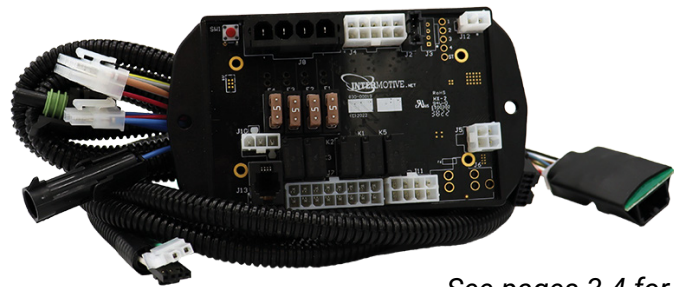

Officer Protection with Custom CAN Utilization

Upfitter Interface Module® + Features

- Provides CAN vehicle data access in order to activate and control equipment
- Acquires CAN data passively to eliminate unnecessary network communication
- Easily programmable using our Graphical User Interface with AND/OR logic
- Eleven digital outputs can be programmed as desired:
 - Momentary (e.g., air horn siren)
 - Latching (e.g., emergency light)
 - Time-hold (e.g., weapons lock)
 - Time-delay (e.g., delayed siren)
 - Flashing (e.g., lights on when door opens)
 - Timeout (e.g., turns off cargo lamp after 30 minutes)
- Multiple inputs can control a single output
- Includes horn mute, radio mute and panic mute (silent alarm)

- Includes **IdleLock™ with AutoSense™**:
 - Theft prevention system for idling vehicles
 - Automatically activates when the officer exits with the OEM fob or the doors are left open; auto-deactivates when the fob returns
 - If the vehicle is shifted out Park without the fob detected, IdleLock will shut the engine off and engage the park brake
 - All lights, equipment and HVAC are still fully functional while system is active
 - System disables auxiliary equipment/ weapons rack or provides lock delay function via an output

See pages 3-4 for a list of CAN data available for configuration.

Police Interface Module (PIM)

- Supports multiple InterMotive features on one module
- Designed specifically for law enforcement vehicles

PIM A* Features

Intelligent Switch Mode

- Custom reprogramming of steering wheel auxiliary buttons
- Enables quick activation of lights, sirens, spotlights, push-to-talk radio and installed InterMotive features
- Increases functionality and efficiency

Officer Protection Package

- Increases an officer's situational awareness by detecting movement behind the vehicle
- Activates the vehicle's rear sensor and camera to enhance the officer's range of vision
- Provides warnings cues, locks doors, flashes lights and more

**PIM A is not a standalone product; it must be combined with PIM B to activate the Officer Protection Package*

PIM B Features

Blackout Mode

- Deactivates exterior and interior lights and chimes, and mutes the horn
- Turns off the center stack screen
- Automatically disengages for safety when vehicle speed reaches between 5-20 mph (configurable)
- Steering wheel activated
- Perfect for covert surveillance and operations

Wig-wag Lights

- Activates rapid alternating lights for front low beams and rear stop/turn lamps
- Highly visible function for catching attention
