Break Out Box

Vehicle Network Multi-Access Hub

BOB

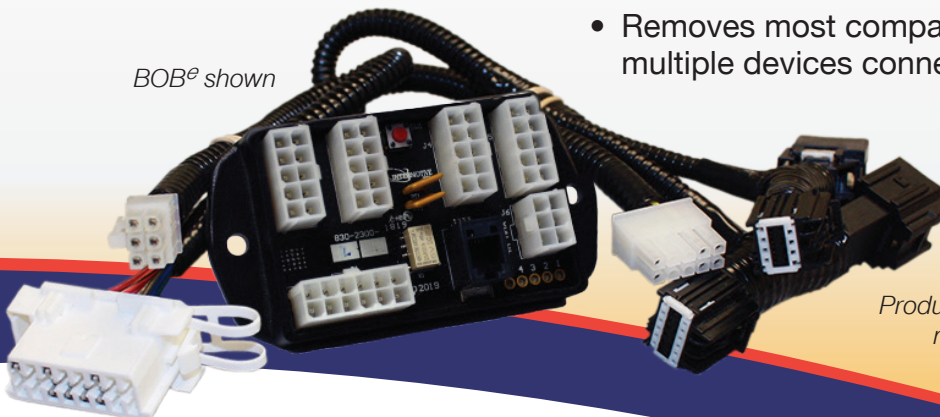

- Provides four module connections to the vehicle network
- Simple plug and play connection to the OEM chassis through the OBDII or a gateway connector, providing a clean, invisible installation
- Eliminates the challenge of installing multiple harnesses when connecting multiple devices
- Third-party devices connect via custom harnesses to any of BOB's 10-pin connectors

BOB^e

BOB^e™ has all the functions of BOB, enhanced with the addition of the InterMotive Safe-T-Net™ product, which:

- Provides five module connections
- Includes an auxiliary CAN network for third-party devices, minimizing impact on the vehicle network
- Passively acquires vehicle data and passes it to third-party devices without requiring changes to their modules
- Removes most compatibility issues when multiple devices connect to the CAN network

BOB^e shown

Product features may vary by make, model or year. See instructions for complete details.
