

# Teach your vehicles new tricks.

Commercial vehicle safety  
and performance optimization products

## What We Do

InterMotive Vehicle Controls provides commercial safety and performance optimization products. Our plug and play electronic control systems leverage a vehicle's own data networks to enhance its function in new ways.

Working closely with chassis and vehicle manufacturers, upfitters and fleets, we design and build products that address safety and performance challenges with practical, custom-tailored solutions.

## Who We Serve

We specialize in class 1-7 commercial vehicle products in these industries:

- Transportation: Transit, Shuttle, School Bus and Personal-use Mobility
- Emergency Response: Law Enforcement, Ambulance and Fire Trucks
- Work Truck and Vocational Vehicles
- Recreational Vehicles

## Product Solutions

Our diverse collection of patented products and configuration tools were born from the desire to make vehicles perform according to your specific needs.

The systems include plug and play connections to the OEM chassis with no cutting of factory wires. Product types offered:

- CAN Data Acquisition (Passive, Active, Commands)
- Forward/Reverse Assistance Systems
- High Idle
- Idle Mitigation
- Interlocks
- Law Enforcement Specific
- Load Control
- Safety/Security
- Speed Limiters
- Switch Control
- Wire Harnessing

**Discover solutions to fleet challenges.**

## Configure Your Way

To accommodate your unique needs, many InterMotive products allow for custom programming. You can choose to order pre-configured modules, custom configs or program yourself.

Downloadable programming utility software and mobile apps provide instant-change capabilities, so your vehicles function exactly how you want.

## Your Insource Advantage

Proudly built in the U.S.A., our products are manufactured and assembled in-house by our team of dedicated, highly trained employees. This means faster turnaround in delivering your products, and the flexibility to react quickly to unexpected situations.

Our on-site engineering team often designs product solutions within weeks, versus OEM improvements, which can take years.

## Committed to Quality

We believe an important part of providing high-quality products is to maintain and continually improve our Quality Management System.

InterMotive is an ISO 9001:2015 registered company by the International Standards Organization to assure customers that our products follow a strict Quality Operating System.

## Application Examples

### CHALLENGE 1: Idling

The vehicle needs to idle to keep the boom lift in operation, but idling wastes money and causes engine wear.

**SOLUTION:** The EcoStar™ idle reduction system automatically turns the engine off and on when specific customizable conditions are met, while allowing full functionality of equipment.

---

### CHALLENGE 2: Theft

The vehicle needs to keep the engine running while the driver assists patients or passengers away from the vehicle, but the risk of theft is high.

**SOLUTION:** The IdleLock™ theft prevention system allows the vehicle to idle securely, locked in Park, with the key removed from the ignition.

---

### CHALLENGE 3: Equipment Control

The carpet cleaning machine needs to start automatically when the vehicle is in Park and the parking brake is set.

**SOLUTION:** The Upfitter Interface Module® programmable device passively reads OEM CAN data to help control or activate equipment when specific vehicle conditions are met.

An ISO 9001:2015 Registered Company

## Our Origin Story

InterMotive, Inc., was founded in 1996 by Greg and Linda Schafer. Like many companies, their first office was the kitchen table, then the garage. Booming sales soon afforded an official location in Fairfield, California.

As the company grew during the early 2000s, headquarters moved between Auburn and Colfax, California. In 2010, InterMotive settled down in Auburn and in 2012, a Midwest facility was opened in Elkhart, Indiana.

In 2014, Linda and Greg founded LGS Group, Inc., to become the master distributor for InterMotive, with headquarters in Incline Village, Nevada.

With over 20 years of significant and continued growth in products, sales, offices and personnel, InterMotive has become a leading manufacturer and designer of electronic vehicle control systems.

We offer the latest technology in optimizing vehicle safety, fuel economy and productivity to meet the ever-evolving needs of our customers.
