IdleLock™
with AutoSense™ Technology
Automatic Vehicle Security for the Dodge Durango

Overview

• An anti-theft system that is automatically activated when the officer exits the vehicle with the key fob
• Transmission is locked in Park while the engine idles, providing power to equipment
• System is instantly disabled when the officer re-enters the vehicle with the key fob

Features

• All lights, equipment and HVAC are still fully functional while the system is engaged
• An output is also provided to allow for disabling the weapons rack or rear hatch 10 seconds after the fob leaves the vehicle
• Designed specifically for the Dodge Durango

Ignition switch “T” harness shown

FCA vehicles may require an FCA remote start antenna.
See instructions for complete details.
