

Dump Truck Warning product helps prevent collision accidents

AUBURN, CALIFORNIA – October 26, 2020

InterMotive Vehicle Controls, a leading manufacturer of electronic control systems, has recently released the Dump Truck Warning System, a product designed to help prevent accidents involving raised dump truck bodies.

The fully automatic system provides an audible and visual warning when the vehicle is moving above a configurable speed and the dump body is not properly stowed. This helps improve safety and reduces the potential for personal injury and equipment damage.

“Major accidents have happened with dump trucks colliding with freeway overpasses, bridges and signs,” says InterMotive President Greg Schafer. “Our system will help prevent this type of situation and keep everyone safe.”

The Dump Truck Warning System is currently available for Ford Super Duty and medium duty vehicles.

InterMotive products are available for purchase from builders, upfitters, dealers and InterMotive’s master distributor, LGS Group. For sales information in Quebec, Canada, contact Protek Vehicle Controls at www.covepro.ca.

###

InterMotive Vehicle Controls provides commercial safety and performance optimization products. Our plug and play electronic control systems leverage a vehicle’s own data networks to enhance its functions in new ways.
