Intelligent Engine Stop/Start System

Overview

- Automatically stop/starts the engine based on customizable conditions to charge the OEM and auxiliary batteries
- System designed for Class B and C RVs including RAM ProMaster and Ford Transit
- Pre-conditions and internal safeguards ensure safe operation of the system
- Simple plug and play connections to the OEM chassis

Features

- Key-out mode provides vehicle security by allowing the key to be removed from the ignition
- High idle function minimizes charging time for batteries
- Includes configurable fuel level monitor to prevent restart on low fuel
- Over rev output prevents overcharging battery
- “Top off” feature charges batteries to 100%
- Monitor Mode activates with audio and visual indicators
- System can be activated with OEM key fob outside the vehicle
- Automatically shuts down engine if it detects an overheat condition while idling in Park
