INTERMOTIVE
VEHICLE
CONTROLS

An ISO 9001:2015 Registered Company

SafeSTOPS

Student Transportation Off-boarding
Protection System

Overview

- Prevents children from getting trapped in bus doors
- Warns the driver of potential life-threatening situations
- Helps passengers safely exit the bus

Features

- Ultrasonic sensors detect objects in the door
- Large LED display and beeper alerts the driver before the vehicle is put in motion
- Includes a mute/override button
- Multiple options are available to customize for your needs:
 - Shift lock to prevent vehicle motion
 - Inhibitor to prevent door operation if the vehicle is not locked down
 - Door controller module to automatically re-open the door
 - Mobile app to custom program settings
 - Heater to keep sensors cleared in colder climates
