

InterMotive launches new chassis body harnessing division

ELKHART, INDIANA – January 13, 2025

InterMotive Vehicle Controls is proud to announce the launch of its new division, InterMotive Connect, providing commercial vehicle chassis harnessing and integrated electronic control systems. This strategic expansion underscores the company's commitment to innovation and growth, aiming to become a single-source partner for its customers.

Located in Elkhart, Indiana, InterMotive Connect uses advanced equipment and software to provide superior, customized wire harnessing solutions for its customers. With its digitized design and build processes, InterMotive Connect can meet customers' complex specifications without sacrificing precision or efficiency. Complete individual harness testing and certification labeling ensures the highest level of quality and traceability.

"We are excited to introduce InterMotive Connect as the next step in our evolution as a comprehensive source for commercial vehicle electronics," says Carl Wacker, President of InterMotive. "We want to provide a one-stop shop for our customers, from switch to load."

InterMotive Connect will be overseen by Wes Rodgers, who brings over 20 years of experience working in bus chassis manufacturing.

Key features of InterMotive Connect include:

- Digitized, automated processes
- Individual harness testing and certification labeling
- State-of-the-art as-build prints
- Multicolor wire marking and ultrasonic connectors

The launch of InterMotive Connect is a significant milestone for InterMotive, reflecting its proactive approach to addressing customer needs. The division's innovative solutions are expected to drive substantial growth and enhance the company's competitive edge.
